

SUZUKI

Safety Support

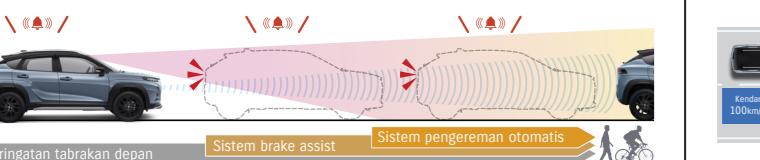

Preventive safety technology

Suzuki Fronx dilengkapi dengan sistem Suzuki Safety Support untuk perjalanan yang selalu aman dan nyaman.

Fungsi-fungsi berikut ini hanya untuk membantu mengurangi kecelakaan dan mungkin tidak berfungsi dengan benar. Harap selalu berkendara dengan aman, tidak tergantung pada sistem, dan membaca buku manual untuk informasi detail mengenai fitur ini.

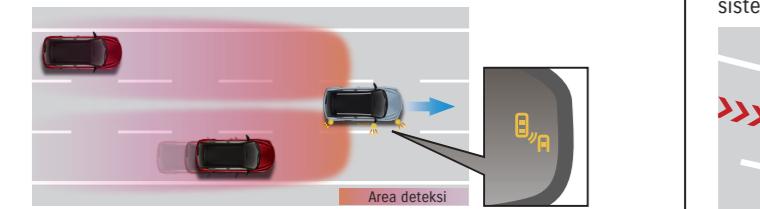

Dual Sensor Brake Support II (DSBS II)

Ketika sensor mendekteksi objek di jalan yang memunculkan potensi terjadinya tabrakan, sistem akan memberikan peringatan kepada pengemudi sehingga pengemudi dapat mengambil tindakan untuk menghindari atau mengurangi dampak jika tabrakan tidak dapat dihindari.

Blind Spot Monitor (BSM)

Membantu pengemudi memeriksa arah belakang saat ingin berpindah jalur dengan menginformasikan keberadaan kendaraan yang mendekat dari arah belakang.

Rear Cross Traffic Alert (RCTA)

Saat mundur di area parkir dan semacamnya, sistem akan mendekteksi kendaraan yang mendekat dari sisi kiri dan kanan belakang kendaraan. Sistem akan memperingatkan pengemudi melalui tampilan peringatan di meter cluster, lampu indikator spion yang berkedip, dan suara peringatan.

Vehicle Swaying Warning (Peringatan Vehicle Swaying)*

Digunakan saat berkendara jarak jauh, sistem mendekteksi garis marka di kedua sisi dan menganalisa pola mengemudi kendaraan. Jika sistem menentukan bahwa kendaraan berjalan tidak stabil (tidak lurus atau menyimpang), maka sistem akan memberikan himbauan peringatan suara dan indikator visual di dalam meter cluster agar pengemudi beristirahat sejenak.

Hill Hold Control

Lewat tanjakan jalan dengan mudah saat berpindah kaki dari pedal rem, dengan sistem yang mencegah mobil bergegas mundur selama dua detik.

Saat pengemudi hendak parkir, empat sensor ultrasonik yang terintegrasi di bumbung belakang dirancang untuk mendekteksi jarak di depan. Sistem akan memberikan peringatan kepada pengemudi melalui suara yang berubah menyesuaikan dengan jarak objek.

Parking Sensor (Sensor Parkir)

Adaptive Cruise Control (ACC)

Berkendara dengan nyaman di jalan tol dan tur kecepatan yang sesuai untuk menjaga jarak yang aman dan sesuai. Sistem ini otomatis mempercepat, memperlambat, dan berhenti sambil mempertahankan jarak yang telah ditentukan dengan kendaraan di depan.

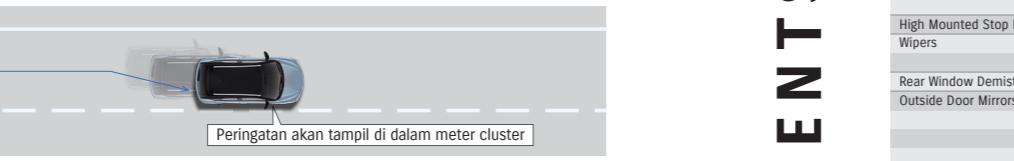

Lane Keep Assist (LKA)

Menjaga kendaraan tetap di tengah lajur saat fitur ACC aktif dengan mendekteksi garis marka di sisi kanan dan kiri dan mengarahkan kendaraan ke tengah lajur. Serta memberi bantuan kemudi untuk menjaga jarak aman jika sistem mendekteksi objek penghalang yang terlalu dekat.

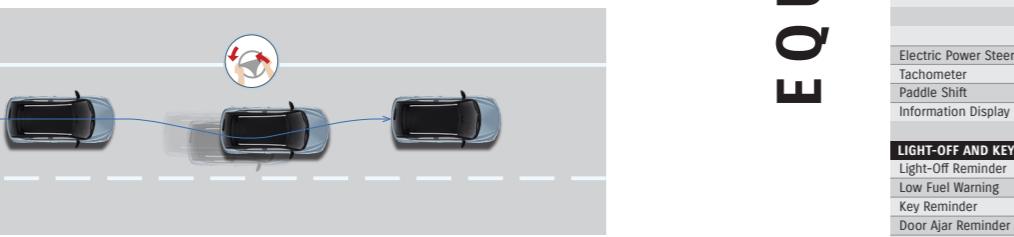

Lane Departure Warning (Peringatan Keluar Jalur)*

Saat berkendara, sistem mendekteksi garis marka dan kondisi jalan di sisi kiri dan kanan, lalu memprediksi arah laju kendaraan. Jika sistem mendekteksi kendaraan hendak keluar jalur, sistem akan memperingatkan pengemudi melalui indikator visual di meter cluster dan peringatan suara atau getaran di roda kemudi.

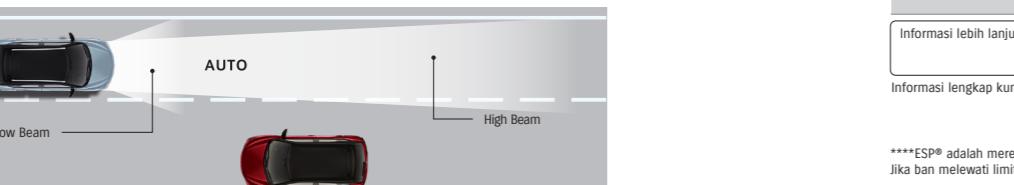

Lane Departure Prevention (LDP)*

Sistem akan membantu mengoreksi roda kemudi untuk menghindari kendaraan keluar dari jalur.

High Beam Assist (HBA)**

Mendeteksi sorotan cahaya dari lampu kendaraan di depan dan sekitar, lalu secara otomatis beralih antara lampu jauh atau lampu dekat.
